

2.4/5GHz 6dbi Dual-Polarized Directional Wi-Fi Antenna with 4 RPTNC Plugs

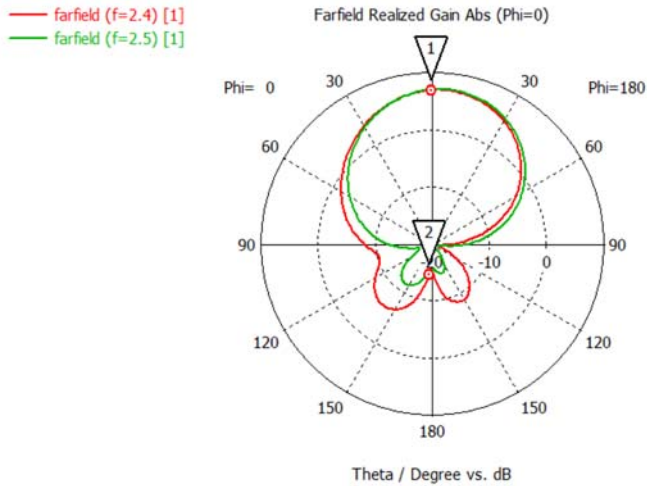

Ventev's TerraWave 2.4/5 GHz 6 dBi High Density Multiple-Input and Multiple-Output (MIMO) Dual-Polarized Directional Wi-Fi Antenna is designed to operate with Cisco's latest 802.11ac Waves I & II WLAN access points. The antenna is a functional equivalent of Cisco's 2566D4M antenna, with the gain and narrow beamwidths required to deliver on user demand for high capacity connectivity. Dual polarization makes it ideal for high scatter environments. Four dual-band leads deliver exceptional performance while simplifying connection to the access point. The antenna ships with a 10" articulating Strong Arm Mount and mounting hardware to support mast and/or wall mounting. *Every Ventev antenna is covered by the company's two-year TerraNet warranty program.
